Frontend Developer with over 10 years of experience building web applications, specialising in JavaScript, React and user-experience optimisation. Currently responsible for the maintenance and frontend development of DeAgostini Publishing's public-facing websites, with growing use of AI-assisted development tools.

PROFESSIONAL EXPERIENCE

Frontend Developer | DeAgostini Publishing

September 12, 2022 – present

- Lead owner of the maintenance and development of the frontend for the company's two public websites
- End-to-end application development, from brief to production deployment, ensuring quality and effective user interfaces
- Ongoing management and updating of libraries and frameworks
- User experience (UX) optimisation
- Integration of AI-assisted development tools (e.g. GitHub Copilot, Claude) to speed up the development cycle
- Use of Docker for the local development environment and AWS/Heroku cloud services for deployment

Technologies: JavaScript, React, Gatsby, CSS, HTML5, Tailwind, PHP, Git, Docker, AWS, Heroku

IT Consultant | Fincons Group, at Banca Mediolanum

January 2020 – September 2022

- Development and testing of new features within the applications
- Collaboration with the client and project manager to refine the architecture design
- Drafting of detailed specification documents

Technologies: Frontend: JavaScript, jQuery, HTML5, CSS (media queries), Aria framework — Backend: Java (MVC pattern), JBoss, EJB, OSB, C++, PL/SQL — Version control: Git (Gitflow, feature branching)

IT Consultant | Banca Mediolanum

June 22, 2015 – January 2020

- Development of new home-banking features
- Technical analysis of issues related to planned changes, including effort estimation
- Application maintenance

Technologies: JavaScript, HTML5, CSS, Java (MVC pattern), Ajax, jQuery, JBoss, EJB, OSB, C++, stored procedures, Git, Oracle (Toad)

Developer | People Lab S.r.l.

From January 2015

- Development of a new web-based attendance management application

Technologies: HTML5, CSS, ASP.NET, JavaScript, Ajax, jQuery, Bootstrap, C#, SQL Server

IT Consultant | People Lab S.r.l., at Allianz (Milan)

From October 2013

- Development of new features for an insurance policy management application

Technologies: Visual Basic, HTML, JavaScript, SQL Server

IT Consultant | Target Sistemi S.r.l., at Aler (Milan)

March – July 2013

- Maintenance of accounts-receivable systems and routine management of the information system

Technologies: JavaScript, ASP.NET, ASP, VBScript, Oracle (Toad)

Intern | DHL Supply Chain S.p.A., Peschiera Borromeo

April 2, 2012 – October 2, 2012

- Development of the front-end graphics for a new tool aimed at improving processes and reorganising information
- Design of a KPI (Key Performance Indicator) monitoring system tied to operational activities

Technologies: JavaScript, ASP.NET, VBScript, MySQL

Warehouse Operator | Tower Light S.r.l. and Ateck S.r.l.

August 25, 2010 – December 31, 2011 (temporary agency contract)

- Supplying materials to production lines, receiving goods and shipping finished products
- Use of SAP for warehouse management and forklift operation

TECHNICAL SKILLS

Frontend: JavaScript, React, Gatsby, jQuery, HTML5, CSS, Tailwind, Bootstrap, Ajax

Backend: Java (MVC), C++, C#, ASP.NET, PL/SQL, EJB, OSB, PHP

Databases: Oracle (Toad), SQL Server, MySQL

Version Control: Git (Gitflow, feature branching)
